DETAILED ACTION

Applicants' arguments, filed 12/23/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

TITLE

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. All of the presently pending claims are directed to a bioagent characterizing service which is not recited in the present title.

NEW MATTER

Claims 51-68 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Instant claim 51, line 6, cites an amplification product. Claim 51, lines 9-10, cites flanking of a variable region by a pair of highly conserved regions. It is noted that all amplification products as instantly claimed include the requirement that a pair of primers are utilized which hybridize to the highly conserved regions cited in claim 51. The generic amplification product citation in the claims lacks this primer practice limitation

Art Unit: 1631

and thus may be the amplification product obtained by non-primer amplification, such as cloning procedures. No such generic amplification product practice is disclosed as filed. Only PCR type amplification practice is disclosed as filed. Therefore the broadening of the amplification product practice as generically now claimed contains NEW MATTER. Claims 52-68 also contain this NEW MATTER due to depending directly or indirectly from claim 51 and lacking any limitation which is directed to the above more limited amplification practice. This rejection is necessitated by amendment.

Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

No claim is allowed.
